Profesyonel ölçüm cihazları
üretim ve otomasyonu

The KFC60 flow calibrator controls the calibration of leak testing and KAO devices, as well as other devices. This lightweight and user-friendly calibrator is essential for field or laboratory checks when accuracy is required. It does not compromise on repeatability. With the KFC60, you can easily monitor and comply with quality standard requirements.

KFC60 FLOW CALLIBRATOR

Key Features

Pocket-sized
+12 hours usage with regular batteries
USB connection
High resolution and accuracy

Features

Atmospheric pressure and temperature
Direct transfer to PC via USB connection
Automatic shutdown when not in use
Battery level indicator
Graphic OLED display
1-year warranty
Internal memory for the last 10,000 records

Capabilities

	Accuracy	Resolution
6 cm ³ /min	%2 value + 0.01 cm ³ /min	0.001 cm ³ /min
60 cm ³ /min	%2 value + 0.1 cm ³ /min	0.01 cm ³ /min

Package Contents

Protective Case
KFC60 calibrator
Precision needle valve
USB cable
12V charging adapter
User manual

Area of Usage

- Accuracy control
in leak testing devices
